

VIJAYAN S

Aspiring Software Developer | Backend & Data Engineering

+91 79040 62686 | vijayanvijay2006@gmail.com | Salem, Tamil Nadu | GitHub: github.com/1-vijayan | LinkedIn: linkedin.com/in/vijayan-s-028644252

PROFESSIONAL SUMMARY

Computer Science Engineering fresher with a strong foundation in Python, Oracle SQL, HTML, and CSS, and hands-on experience building web and data-driven applications. Demonstrated ability to develop and deploy deep learning models and full-stack web solutions. Passionate about backend development and data engineering, with a focus on building efficient, scalable, real-world systems.

EDUCATION

B.E. Computer Science Engineering 2022 – 2026

Dhirajlal Gandhi College of Technology, Salem | Anna University | CGPA: 8.14

12th Grade – Higher Secondary (Maths & Biology) 2021 – 2022

The Gugai Higher Secondary School | State Board | 71%

10th Grade – Secondary School 2019 – 2020

The Gugai Higher Secondary School | State Board | 64%

TECHNICAL SKILLS

Languages: Python, Oracle SQL, HTML5, CSS3, JavaScript (Basic), PHP (Basic)

Frameworks & Libraries: Flask, Bootstrap, TensorFlow, Keras, scikit-learn

Machine Learning: Convolutional Neural Networks (CNN), Image Classification, Data Augmentation

Database: Oracle SQL, MySQL

Tools & Platforms: Git, GitHub, VS Code

PROJECTS

AI-Based Automated Detection & Classification of Diabetic Retinopathy Jan 2026 – Feb 2026

Technologies: Python, TensorFlow/Keras, CNN, Flask, scikit-learn

- Developed a CNN-based deep learning model to classify diabetic retinopathy from retinal fundus images across multiple severity stages.
- Applied image preprocessing and augmentation techniques (normalization, rotation, flipping) to improve model generalization.
- Achieved 85.4% classification accuracy on the test dataset.
- Built and deployed a Flask web application enabling users to upload fundus images and receive real-time classification results.
- [GitHub Repository: https://github.com/1-vijayan/DR](https://github.com/1-vijayan/DR)

Student Management System Mar 2026 – Apr 2026

Technologies: Python, Flask, MySQL, HTML5, CSS3, Bootstrap

- Developed a full-stack Student Management System using Flask and MySQL.
- Implemented CRUD operations for managing student records efficiently.
- Integrated MySQL database with Flask backend for data storage and retrieval.
- Built responsive frontend pages using HTML5, CSS3, and Bootstrap.
- [GitHub Repository: https://github.com/1-vijayan/student-management](https://github.com/1-vijayan/student-management)

INTERNSHIP EXPERIENCE

Front-End Development Intern – LM Techs, Salem Dec 2025 – Jan 2026

- Developed responsive and cross-browser-compatible web pages using HTML5, CSS3, Bootstrap, and JavaScript.
- Implemented backend functionality using PHP and managed relational databases with MySQL.
- Built form validation logic and integrated front-end interfaces with database-driven backend systems.
- Participated in deployment and functional testing of web applications.

CERTIFICATIONS

Foundations of User Experience (UX) Design Google – Coursera

NPTEL Design Thinking Jan 2026 – Feb 2026

Elite + Silver | Scored in Top 2% among 7,204 candidates nationally

ACHIEVEMENTS & RECOGNITION

- Ranked in the Top 2% nationally among 7,204 candidates in the NPTEL Design Thinking certification – awarded Elite + Silver distinction.
